

Smart Timetable User Manual

Welcome to the Smart Timetable help center. Below you will find easy-to-understand instructions on how to use the system.

1. Getting Started

The Smart Timetable is designed to be simple. When you open the app, you will need to log in. There are two types of accounts:

- Admin (Principal/Manager): Has access to all overview stats, can see everyone's timetables, and manage teacher leaves and substitutions.
- Teacher: Has access to their personal dashboard, can view all timetables, and can see if they have been assigned as a substitute.

2. Viewing Timetables

To see the schedule for any class, click on the "Timetables" button in the left menu.

- You can select a specific class (like Class 1, Class 2, etc.) from the top menu.
- The timetable shows all periods from Monday to Friday.
- If a teacher is on leave, their class will be marked with a special Substituted badge, showing who the new teacher is for that period.

3. Managing Leaves & Substitutions (Admins Only)

If you are an Admin, you will see a "Leave & Substitution" button in the menu. This is where the magic happens!

- To mark a teacher on leave, click the "Record New Leave" button, select the teacher, and choose the date.
- The system will automatically find available substitute teachers who are free during those specific periods!
- You can review the suggested substitutions and click "Approve & Save" to finalize them. The timetable will instantly update for everyone.

4. Teacher Dashboard

If you are a Teacher, your home page is your Dashboard.

- It shows exactly what classes you have today and what subject you are teaching.
- If an admin assigns you as a substitute for another teacher who is absent, that extra class will clearly appear on your dashboard with a "Substitute" label.
